

Can you employ turnkey security operations?

The cyber threat is being called one of the greatest threats to our security, financial stability and privacy in the last 30 years. New threats are arising every day that organizations must be able to thwart to avoid catastrophic events. Evolver is the cyber team on the front lines of the cyber landscape with the experience, tools and skills to secure our clients' enterprises. Evolver's cyber operations teams currently protect tens of thousands of Government and commercial users with a specialization in protecting highly critical, large data and transactional enterprises.

OUR APPROACH

*Based on NIST Cybersecurity Framework

SERVICES

Audits and Testing

Our security audit includes both technical and procedural analysis. As part of this service, vulnerability assessments and penetration testing are performed to determine weaknesses in your systems.

Data Breach/Incident Response

We use preventative/defensive measures and risk mitigation strategies. Our technical and operational support focuses on preemptive/defensive solutions to minimize risk and exposure, including auditing, testing, and monitoring.

Security Operations Center (SOC)

As part of our integrated response strategy, Evolver offers monitoring, management, and threat remediation for your security infrastructure. We utilize service level agreement (SLA) based notification and escalation.

Managed Security Services

Whether you would like to take a fully outsourced approach or just need assistance with a specific security issue, Evolver can support your security needs.

- Technical Consulting
- Security and Risk Assessments
- Vulnerability and Penetration Testing
