In-Depth Cyber Defense Against a Constantly Changing Threat Landscape

From government bodies to businesses and essential infrastructure, everyone can be the target of a cyber attack. But finding skilled teams with the right mix of expertise and flexibility remains a challenge and an ever-scaling investment. At Evolver Federal, we tailor our approach to fit your needs, blending battle-tested methods with forward-thinking strategies. We're not just about checklists. We're your customized roadmap to cybersecurity excellence, now and tomorrow.

Capabilities

Program Management
- Security & Privacy Policies
- Security Management
- Continuous Service Improvement
- Security Training

Security Operations Center
- Security/Network Monitoring
- Incident Response Tier 1 – Tier 3
- Incident Remediation
- Network Forensics/Data Analysis

Security Engineering & Architecture
- Security Tool Stack Integration
- Security Tool Management
- Security Hardening/STIGs
- Data Loss Prevention
- Security Orchestration and Automation
- Security Dashboards

Intelligence Services
- Cyber Threat Intelligence
- Insider Threat

Pentration Testing
- Red Team
- Blue Team
- Purple Team
- Threat Hunting

Risk Management Framework Support
- ISSO Services/Support
- Security Assessments
- Security Code Reviews
- Audit Support and Remediation
- Continuous Monitoring
- Vulnerability Management
- FISMA Reporting

Transformative Achievements in Efficiency and Security

Automations = 1,908,662
Records = 55,338 records
Hours Saved = 111,720
ROI = $9,247,165

Our streamlined processes slashed Mean Time to Detect (MTTD) and Mean Time to Resolve (MTTR) by over 90%

Evolver is tool-agnostic, adapting to your existing setup seamlessly

In under 18 months, Evolver elevated Process Maturity from Level 1/2 to Level 4/5

ISO 9001   I   ISO/IEC 20000-1   I   ISO/IEC 27001   I   CMMI-SVC ML3   I   CMMI-DEV ML3

nvtc TECH 100 HONOREE 2023

DHS USCIS CASE STUDY: Revamping Cybersecurity Resilience in the Modern Age

Situation

USCIS sought contractor support to fortify its defenses against surging cyber threats. From pinpointing risks to orchestrating swift responses, the mission was clear: modernize every facet of cybersecurity to safeguard USCIS systems and data. From identifying cyber risks to orchestrating lightning-fast responses, every aspect of USCIS's cybersecurity strategy was up for reinvention.

Approach

Centered on strategic initiatives, Evolver Federal's approach prioritized continuous improvement, captured and provided via automated deliverables and reporting methods. The team deployed a combination of scripting techniques and Splunk data integration, enabling us to extract valuable insights from our security stack with precision and agility.

Results Achieved

Through our innovative approach, we achieved remarkable results:

- Maturing process workflows from CMMI Level 2 to Level 4, with select areas reaching the pinnacle of Level 5, fully automated.
- Our automation, named the Security Orchestration, Automation, and Response (SOAR) Center of Excellence set a new standard for excellence within DHS.
- Not only did this initiative enhance USCIS cyber defense capabilities, but it also generated substantial manual cost savings of over $7.5 million.
