

How secure is your data?

Stay ahead of tomorrow's threats with Evolver.

From selecting and integrating security tools for your infrastructure to our security management and monitoring services, we are your trusted technology partner.

Evolver provides law firms and corporate legal departments with a wide variety of technology services that respond to data privacy and cybersecurity challenges. We have a unique blend of IT and legal expertise and also have partnerships with leading providers such as Microsoft, Artic Wolf, Galaxkey, Pondurance, and SentinelOne, allowing us to offer solutions that reflect your specific needs and individual requirements.

We work as an independent agent augmenting in-house capabilities with professional technical support; and we also work with consultants and outside counsel, providing a variety of technical platforms and support services, including enterprise-level solutions that manage the effectiveness of security, data breach and incident response plans.

SERVICES

Assessments

Both technical and procedural analysis. As part of this service, vulnerability assessments and penetration testing are performed to determine potential weaknesses in your systems.

Digital Risk Management

Affordable Software as a Service (SaaS) solutions that cover policies, enterprise risk, compliance and vendor management.

Data Breach/Incident Response

Provide technology to support your data breach/incident response plan. This can include auditing, testing and monitoring.

Security Operations Center

Monitoring, management and threat remediation for your security infrastructure.

Governance, Risk & Compliance (GRC)

Technical integration, management and support of various enterprise platforms.

Managed Security Services

Whether you would like to take a fully outsourced approach or just need assistance with a specific security issue, Evolver supports your security needs.
