

Data Protection Confidence with Galaxkey

The end-to-end encryption platform that sets the standard for data protection and communication privacy. With three levels of identity-based encryption, you can protect all your data and communications, even when they leave your network.

Email Encryption

Secure emails in **store** and in **transit**

File Encryption

Secure files in store on both **Windows** and **macOS**

Electronic Signatures

A secure mechanism to **sign** documents electronically

Secure Workspace

Secure **files** in **store** and in **transit**

Secure Instant Messaging Launching in Q4

**A leading-edge tool +
a world-class
consulting team**

We can assist in identifying best uses for Galaxkey, supporting deployment, training, and building policies to ensure a seamless integration with your enterprise applications.
